

## MINERAL COMPOUND FERTILIZERS FOR SPECIFIC CROPS OBTAINED BY PHYSICAL COMPACTION

The products of the K-SPECIAL LINE are complex mineral fertilizers that have been developed to provide a solution to the nutritional requirements of specialised crops: orchards, olive groves, vineyards, citrus groves, horticultural crops, hazelnut groves. These products have been created to provide the right amount of crop specific nutritional elements and a good availability of sulfur, calcium and microelements that should satisfy the basic nutritional requirements even of the most demanding crops.

The effectiveness of these products is improved by the granular formulation obtained through compaction, a dry granulation process borrowed from the pharmaceutical industry that uses mechanical compression to agglomerate the particles of the raw materials. This allows for granules to be obtained without adding solvents, which can have a negative impact on the final solubility of the product. The compacted granules rapidly dissolve in the ground allowing a fast nutrients' root uptake, making these fertilizers very efficacious. Low Chlorine Content (LCC/BTC) formulations are also available that couple all the advantages of the NPKs with the quality of Low-Chlorine Potassium (< 2%), which is the best quality of potassium.

K-S 30 B.T.C. is the fertilizer of the K-SPECIAL VIGNETO-FRUTTETO LINE with a nourishing and fortifying action, to be used in one / two applications divided between autumn and vegetative restart. Particularly suitable for all chlorine sensitive crops.

CROP	TIME OF APPLICATION	DOSE/HECTARE*
Citrus (Orange, Bergamot, Clementine, Lemon, Tangerine), Beets e Tobacco, Strawberries, Small fruits (Raspberry, Blueberry, Blackberry, Currant), Horticultural crops e Grapes	Pre-transplanting/sowing fertilization, Post-transplanting/sowing fertilization	400-800 kg

COMPOSITION	
Potassium oxide (K <sub>2</sub> O) total	30.00%
Potassium oxide (K <sub>2</sub> O) soluble in water	30.00%
Magnesium oxide (MgO) total	8.00%
Magnesium oxide (MgO) soluble in water	8.00%
Sulfuric anhydride (SO <sub>2</sub> ) soluble in water	26.00%

PHYSICO-CHEMICAL FEATURES		
<b>GRANULAR</b>		
<b>METHOD OF USE</b>		
	Cover fertilization	Pre-sowing fertilization

**PACKAGING: 25 KG - PALLET 1500 KG, BIG BAG 600 KG**
