

K-SOL 20-20-20 + ME

STIMULATES A BALANCED PLANT DEVELOPMENT

The K-SOL LINE consists of a wide range of highly soluble fertilizers with a large variety of macronutrients ratios, to best meet individual crop requirements and production expectations. The microelements, present in a totally chelated form, help prevent and treat any physiological plant disorder associated to their deficiency. The K-SOL LINE is suitable for any fertigation system.

K-SOL 20-20-20 + ME is the fertilizer of the K-SOL LINE characterized by a macroelements (NPK) ratio of 1 : 1 : 1 that makes it particularly suitable for fertigation of any crop, during all stages of the crop cycle.
