NGOOO NPK 22-5-8

MINERAL COMPOUND FERTILIZERS FOR SPECIFIC CROPS OBTAINED BY PHYSICAL COMPACTION

The products of the K-SPECIAL LINE are complex mineral fertilizers that have been developed to provide a solution to the nutritional requirements of specialised crops: orchards, olive groves, vineyards, citrus groves, horticultural crops, hazelnut groves. These products have been created to provide the right amount of crop specific nutritional elements and a good availability of sulfur, calcium and microelements that should satisfy the basic nutritional requirements even of the most demanding crops.

The effectiveness of these products is improved by the granular formulation obtained through compaction, a dry granulation process borrowed from the pharmaceutical industry that uses mechanical compression to agglomerate the particles of the raw materials. This allows for granules to be obtained without adding solvents, which can have a negative impact on the final solubility of the product. The compacted granules rapidly dissolve in the ground allowing a fast nutrients' root uptake, making these fertilizers very efficacious. Low Chlorine Content (LCC/BTC) formulations are also available that couple all the advantages of the NPKs with the quality of Low-Chlorine Potassium (< 2%), which is the best quality of potassium.

N-GOOO NPK 22-5-8 is the fertilizer of the K-SPECIAL- NOCCIOLETO PLUS LINE with a high nitrogen content, balanced by phosphorus and potassium. Thanks to the presence of the nitrification inhibitor DCD, the nitrogen present is gradually transformed from ammonia to nitric form, ensuring balanced and constant nitrogen nutrition for up to 3 months. To be used at the vegetative restart, at pre-flowering and whenever the crop shows growth interruptions.

CROP	TIME OF APP	TIME OF APPLICATION			DOSE/HECTARE*	
Nut fruits, Hazelnut e Walnut		Pre-transplanting/sowing fertilization, Post-transplanting/sowing fertilization			400-600 kg	
COMPOSITION			PHYSICO-CHEMICAL FEATURES			
Total nitrogen (N) 2		22.00%	GRANULAR			
Ammoniacal nitrogen (N)		8.00%		iiiiii by	2020	
Ureic nitrogen (N)		14.00%	METHOD OF USE	<u>87</u> .	6776776	
Nitrogen inhibitor Dicyandiamide (DCD)		2.50%		Cover fertilizatior	n Pre-sowing fertilization	
Phosphoric anhydride (P_2O_5) total		5.00%	PACKAGING: 25 KG - PALLET 1500 KG, BIG BAG 600 KG			
Phosphoric anhydride (P_2O_5) soluble in mineral acids		5.00%				
Potassium oxide (K ₂ O) total		8.00%				
Potassium oxide (K ₂ O) soluble in water		8.00%				
Calcium oxide (CaO) total		2.00%				
Calcium oxide (CaO) soluble in water		2.00%				
Magnesium oxide (MgO) total		2.00%				
Sulfuric anhydride (SO₃) soluble in water		10.00%
