

HUREM (N) 2% MgO +

ME

STIMULATES A VIGOROUS PLANT DEVELOPMENT PREVENTS PHYSIOLOGICAL PLANT DISORDERS RELATED TO MAGNESIUM DEFICIENCY

The K-SOL LINE consists of a wide range of highly soluble fertilizers with a large variety of macronutrients ratios, to best meet individual crop requirements and production expectations. The microelements, present in a totally chelated form, help prevent and treat any physiological plant disorder associated to their deficiency. The K-SOL LINE is suitable for any fertigation system.

HUREM (N) 2% MgO + ME is a fertilizer of the K-SOL LINE based on technical urea with a low biuret content. It is enriched with magnesium and microelements (boron, manganese, zinc), essential for a perfect and balanced plant metabolism. HUREM (N) 2% MgO +ME can be applied on various crops, both by foliar application and fertigation, and in different environments. It is particularly indicated when it is intended to follow criteria of high nitrogen-use efficiency and reduced environmental impact of nitrogen fertilization, while keeping high-quality yields.

CROP	TIME OF APPLICATION	DOSE/HECTARE*
All crops	Vegetative phase	25-50 kg

COMPOSITION		PHYSICO-CHEMICAL FEATURES	
Total nitrogen (N)	41%	SOLUBLE POWDER	
Ammoniacal nitrogen (N)	1%	pH (sol 1%)	8.3
Ureic nitrogen (N)	40%	Conductivity E.C. $\mu\text{S}/\text{cm}$ (1‰)	575
Magnesium oxide (MgO) soluble in water	2%	METHOD OF USE 	
Boron (B) soluble in water	0.05%		Fertigation
Manganese (Mn) soluble in water	0.10%		
Zinc (Zn) soluble in water	0.10%		

PACKAGING: 20 KG
